REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach nor fairly suggest a method of making a multi-ply tissue in which at least two tissues are fixably attached by passing them through an embossing nip, said embossing nip having the claimed number of protrusions/embossing elements, then the embossed tissue is calendered to the claimed level(s), then lotioned to the claimed stationary and dynamic contact transfer properties ratio, as claimed. Note that the tissue made by the process has been considered also to define over the prior art, since the process produces a tissue which is embossed, calendered, lotioned tissue with a ratio of static and dynamic transfer greater than 5, which is not taught nor suggested by the prior art. Note that such properties, specially the ratio of the static and dynamic transfer, cannot be assumed to inherent to the papers of the cited reference since the process of making the papers are different. See also applicants' arguments filed on May 14, 2008.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
